Ambab SlidingCart

This extension enables the system to replace the minicart into slidingcart. It takes your mini cart to the next level with responsive design and conversion oriented features. Optimize user experience by allowing cart summary review in one glace, without leaving the product page. The result? Improved conversion as the customer goes directly to checkout; no need to visit the shopping cart page!

Features

- Sliding cart with more details

- Apply & remove coupon.

- View total summary.

- Easy to modify the products in the cart.

- Removes sliding cart from cart & checkout page.

- 100% open source

- Easy to install
